Dear Sir / Madam

Permission to reproduce copyright images

I am currently registered as a final year PhD student within the Department of Materials at Imperial College, London, UK. In partial fulfilment of my degree requirements, I am writing a thesis which needs to include a review of current thinking and data in my area of study (Refractories). I hereby request permission to reproduce images 4 and 5 on pages 28 and 31 respectively, of Chapter 2 (Fracture of Refractories, R.C. Bradt) in the book "Refractories Handbook" to which CRC Press (Taylor and Francis Group) hold the copyright, as part of this review.

The image will be used without modification and with full acknowledgement, in a thesis entitled, "The Role of Aggregates in the Thermal Stability of Mg-PSZ Refractories for Vacuum Induction Melting". The study evaluates how fused aggregates comprising magnesia-partially-stabilised-zirconia (Mg-PSZ) modify microstructurally and thermomechanically after eight service cycles to temperatures around 1700 °C. The thesis is due for submission at the end of August 2014 and if successfully defended by viva, will be made publically available within 18 months, in copyright-controlled electronic form, through Imperial College.

I will include a copy of your response in the thesis submission.

Yours sincerely

Amanda Quadling
