Research Policy

- “Seal of approval” for good reproducibility practice.
- Promote educational and training opportunities.
- Use of dynamic publishing formats.
- Research reports stating key reproducible features of a result.
- More community discussion and understanding of reproducibility.

Education

- Education in good computational practice, available at all levels.
- Opportunities for networking, training and professional development.
- Better code design.
- Code easier to install, use and extend.
- Use of dynamic formats during the process of research.
